

Wen Wu, IEEE Senior Member

Associate Researcher
Peng Cheng Laboratory
2 Xingke No. 1 Street
Shenzhen, Guangdong, China

Email: wuw02@pcl.ac.cn,
w77wu@uwaterloo.ca
Homepage: <https://wuwenustc.github.io/>

RESEARCH INTEREST

- Holistic network virtualization: Network digital twin and network slicing
- Pervasive network intelligence: Networking for AI and AI for networking
- mmWave networking: Medium access control and beam alignment

EMPLOYMENT

- **Associate Researcher** Nov. 2021 – Present
Frontier Research Center
Peng Cheng Laboratory, Shenzhen, Guangdong, China
- **Postdoctoral Research Fellow** Oct. 2019 – Aug. 2021
Department of Electrical and Computer Engineering
University of Waterloo, Waterloo, Ontario, Canada
Supervisor: Professor Xuemin (Sherman) Shen

EDUCATION

- **Doctor of Philosophy, Electrical and Computer Engineering** Sept. 2015 – Aug. 2019
University of Waterloo, Waterloo, Ontario, Canada
Supervisor: Professor Xuemin (Sherman) Shen
Thesis: Design and Analysis of Beamforming in mmWave Networks
- **Master of Engineering, Communication and Information Systems** Sept. 2012 – Jun. 2015
University of Science and Technology of China, Hefei, China
Supervisor: Professor Guo Wei
Thesis: Interference Alignment with Limited Feedback for Multiuser Interference Networks
- **Bachelor of Engineering, Information Engineering** Sept. 2008 – Jun. 2012
South China University of Technology, Guangzhou, China
Advisors: Professor Yuli Fu and Professor Wenyi Zhang
Final Year Project: Performance Analysis of Monobit Digital Receivers

HONORS and AWARDS

- Distinguished Researcher Position (Level-C), Peng Cheng Laboratory, 2022
- Faculty of Engineering Graduate Scholarship Award, University of Waterloo 2019
- Graduate Scholarship, University of Waterloo 2015 – 2019
- International Doctoral Student Award, University of Waterloo 2015 – 2019
- Best Speaker Award, ECE Graduate Seminar Series, University of Waterloo 2015
- Guorui Scholarship, China Electronics Technology Corporation 14th Research Institute 2014
- China Scholarship for Encouragement, Ministry of Education of P. R. China 2010
- First Prize of South China University of Technology,
Guangdong Province Undergraduate Contest in Physics Experiments Design 2010

PUBLICATION

Publication Statistics

- 1 book, 3 book chapters, 1 US patents, 51 accepted/published papers (29 journal papers and 22 conference papers), and 10 preprints
- Total number of citations: 970, h-index: 15, and i10-index: 22 (Source: Google Scholar, Date: Mar. 31, 2022)

Books

- [B1] Peng Yang, **Wen Wu**, Ning Zhang, and Xuemin Shen, “Millimeter-Wave Networks: Beamforming Design and Performance Analysis,” Springer, ISBN-10: 3030886298, ISBN-13: 9783030886295, 2021. (169 pages)

Book Chapters

- [BC1] **Wen Wu**, Yujie Tang, Peng Yang, Weiting Zhang, and Ning Zhang, “Collaborative Deep Neural Network Inference via Mobile Edge Computing,” *Broadband Communications, Computing, and Control for Ubiquitous Intelligence*, Editors: L. Cai, B. L. Mark, and J. Pan, Springer, ISBN-10: 3030980634, ISBN-13: 9783030980634, 2022.
- [BC2] Qiang Ye and **Wen Wu**, “Network Slicing for 5G Networks and Beyond,” *Broadband Communications, Computing, and Control for Ubiquitous Intelligence*, Editors: L. Cai, B. L. Mark, and J. Pan, Springer, ISBN-10: 3030980634, ISBN-13: 9783030980634, 2022.
- [BC3] Yujie Tang and **Wen Wu**, “Routing Algorithms for Heterogeneous Vehicular Networks,” *Broadband Communications, Computing, and Control for Ubiquitous Intelligence*, Editors: L. Cai, B. L. Mark, and J. Pan, Springer, ISBN-10: 3030980634, ISBN-13: 9783030980634, 2022.

Patents

- [T1] Xuemin Shen, **Wen Wu**, Mushu Li, Kaige Qu, Conghao Zhou, Weihua Zhuang, and X. Li, “Systems and Methods for Cluster-Based Parallel Split Learning,” United States, Patent Ref: 92011852PCT01, 2022. Patent Status: Pending.

Preprints

- [P1] Ruijin Ding, Jiawei Chen, **Wen Wu**, Jun Liu, Feifei Gao, and Xuemin Shen, “Packet Routing in UAV Multi-Hop Network: A Multi-agent Deep Reinforcement Learning Approach,” submitted to *IEEE Transactions on Vehicular Technology (TVT)*, under minor revision, 2021.
- [P2] Qiong Liu, Peng Yang, **Wen Wu**, Ning Zhang, and Li Yu, “Intelligent In-Network Queue Control for Fair and Low-Latency Packet Transmission,” *IEEE Transactions on Cognitive Communications and Networking (TCCN)*, major revision, 2021.
- [P3] Jie Lin, Peng Yang, **Wen Wu**, Ning Zhang, Tao Han, and Li Yu, “Resource-Efficient Adaptive Query Scheduling for Low-Latency Edge Video Analytics,” under revision, *IEEE Transactions on Mobile Computing (TMC)*, 2021.
- [P4] Haina Zheng, Ke Xiong, **Wen Wu**, Pingyi Fan, Zhangdui Zhong, and Xuemin Shen, “Age of Information-Based Efficiency Design in Point-to-Point Communication Link,” submitted to *IEEE Wireless Communications Letter (WCL)*, 2021.
- [P5] Zhe Ma, **Wen Wu**, Feifei Gao, and Xuemin Shen, “Deep-Learned Non-Coherent Transmission for Massive Machine-Type Communications,” manuscript, 2022.
- [P6] Xiaoxiao Zhuo, **Wen Wu**, Fengzhong Qu, and Xuemin (Sherman) Shen, “Value of Information-Based Packet Scheduling Scheme for AUVs in Underwater Acoustic Sensor Networks,” manuscript.
- [P7] Zhi Mao, Fengye Hu, **Wen Wu**, Huaqing Wu, Xuemin Shen, “Joint Distributed Beamforming and Backscatter Cooperation for UAV-Assisted WPSNs,” submitted to *IEEE Transactions on Wireless Communications (TWC)*, 2022.
- [P8] Zhixuan Huang, Peng Yang, Ning Zhang, Feng Lyu, Qihao Li, **Wen Wu**, and Xuemin Shen, “Design and Analyze for Joint Framework of Viewpoint Prediction and Tile Selection,” submitted to *IEEE Transactions on Mobile Computing (TMC)*, 2022.
- [P9] **Wen Wu**, Mushu Li, Kaige Qu, Conghao Zhou, Xuemin Shen, Weihua Zhuang, Xu Li, and Weisen Shi, “Split Learning over Wireless Networks: Parallel Design and Resource Management,” manuscript, 2022.

- [P10] Jianzhe Xue, Yunting Xu, **Wen Wu**, Tianqi Zhang, Qinghong Shen, Haibo Zhou, Xuemin (Sherman) Shen, “Sparse Mobile Crowdsensing for Cost-Effective Traffic State Estimation via Transformer GNN,” manuscript, 2022.

Journal Papers

FUNDING APPLICATION ASSISTANCE

- [F1] **Proactive User-centric Networking for Next Generation Wireless Communications**
 Funded by NSERC Collaborative Research and Development Grant
 PI: Professor Xuemin (Sherman) Shen
 Industrial partner: Huawei Canada
 My contributions: Milestone scheduling, activity planning, and monthly meeting with industrial cooperators.
- [F2] **High Efficiency Wireless LAN MAC Layer Design**
 Funded by NSERC Collaborative Research and Development Grant
 PI: Professor Xuemin (Sherman) Shen
 Industrial partner: Huawei Canada
 My contributions: Milestone deliver and monthly meeting with industrial cooperators.

SELECTED SEMINARS AND PRESENTATIONS

- [P1] Network Slicing for Service-Oriented Vehicular Networks,
International Workshop on Mobile Edge Computing and Security – Peng Cheng Laboratory & University of Electronic Science and Technology of China, Jan. 8-9, 2022.
- [P2] RAN slicing for Vehicular Networks: Perspectives of AI and Optimization,
Huawei Workshop on Next Generation Networks: Theory and Technologies – Department of Electrical and Computer Engineering, University of Waterloo, Apr. 8, 2021.
- [P3] Dynamic RAN Slicing for Service-Oriented Vehicular Networks via Constrained Learning,
BBCR Seminars – Department of Electrical and Computer Engineering, University of Waterloo, Oct. 22, 2020.
- [P4] AI-assisted Next Generation Wireless Networks,
UW & Huawei Workshop – Department of Electrical and Computer Engineering, University of Waterloo, Jul. 25, 2019.

Shanghai, China, Aug. 4–7, 2014.

RESEARCH EXPERIENCES

Department of Electrical and Computer Engineering, University of Waterloo, Canada

Postdoctoral Research Fellow, Broadband Communications Research (BBCR) Laboratory

■ **Artificial Intelligence for Next Generation Wireless Networks (1 JSAC, 1 TII, 1 WCM and 2 EIC invited papers)**

- ***Edge Intelligence for Wireless Networking*** **Mar. 2020 – Oct. 2021**
 - Design edge intelligence solutions for multi-dimensional resource management and differentiated service provisioning, especially in highly dynamic network environments
 - Develop edge intelligence protocols for large-scale wireless networks with distributed data storage, computing, and communication resources.
- ***Intelligent Network Slicing for Vehicular Networks*** **Sept. 2019 – Oct. 2021**
 - Cooperate with Huawei Canada Co. to investigate next generation vehicular networks
 - Design a dynamic radio access network (RAN) slicing framework to support Internet of vehicles services with different quality of service (QoS) requirements, adapting to spatial-temporally varying vehicle traffic
 - Develop novel machine learning algorithms to make real-time RAN slicing decisions while satisfying multi-fold slice QoS requirements.
- ***Edge Inference for Industrial IoT*** **Sept. 2019 – Sept. 2020**
 - Designed a collaborative inference framework by leveraging on-board and edge computing resources to reduce deep neural network inference service delay
 - Designed a sampling rate adaption mechanism for IoT devices to reduce the amount of offloaded sensing data volume
 - Proposed a deep reinforcement learning based scheduling algorithm to make the optimal sampling rate adaption and resource allocation decisions.

Research Assistant, Broadband Communications Research (BBCR) Laboratory

■ **Design and Analysis of Beamforming in mmWave Networks (1 TWC and 2 TVT papers)**

- ***Beam Alignment for mmWave Communications*** **Sept. 2017 – Aug. 2019**
 - Proved that received signal strength among nearby beams in the beam alignment process is correlated in the multipath channel
 - Proposed a machine learning based fast beam alignment algorithm by leveraging correlation structure among beams and the prior knowledge on the channel fluctuation to reduce beam alignment latency
 - Analyzed theoretical performance to validate the proposed algorithm is asymptotically optimal.
- ***Cooperative Edge Caching for mmWave Dense Networks*** **Sept. 2016 – Dec. 2018**
 - Proposed a device-to-device assisted cooperative edge caching policy by cooperatively utilizing cache resources of users and nearby small base stations to enhance caching performance
 - Derived closed-form expressions of backhaul offloading gain and content retrieval delay in mmWave dense networks based on stochastic network information
 - Analyzed the impacts of network density and practical directional antennas on the performance of the proposed caching policy.
- ***Medium Access Control (MAC) Protocol for Beamforming Training*** **Sept. 2015 – Aug. 2019**
 - Collaborative research with Huawei Canada Co.
 - Proposed an analytical model to evaluate MAC performance of beamforming training protocol in IEEE 802.11ad standard
 - Derived the closed-form expressions of protocol performance, including successful training probability, network throughput and training latency

- Developed an enhancement scheme to improve beamforming training efficiency by tuning protocol parameters with respect to user density.

University of Science and Technology of China, China

Research Assistant, Wireless Information Network Laboratory

■ Interference Alignment in Wireless Networks

- *Interference Alignment with Limited Feedback* Mar. 2013 – Jun. 2015
 - Analyzed the impact of limited feedback on interference alignment algorithms by deriving the average interference leakage in different wireless channels
 - Proposed a joint real Grassmannian quantization strategy to reduce the overhead of feedback information
 - Analyzed the theoretical performance of the proposed strategy based on chordal distance analysis
 - Analyzed the impact of channel estimation error on the interference alignment performance.
- *Performance Analysis of Monobit Digital Receivers* Feb. 2012 – Jun. 2012
 - Analyzed the theoretical performance of optimal and suboptimal algorithms of the monobit digital receiver
 - Validated the theoretical results of two algorithms via simulations.

TEACHING AND MENTORING EXPERIENCES

Teaching Experiences

- **Teaching Assistant, University of Waterloo** Jan. 2017 – Apr. 2017
Undergraduate course: Numerical Methods (ECE 204A)
Duties: Dealing with the problems students have during and after the classes, and marking assignments and final exam.
- **Certificate of Expectations Teaching Assistant (TA) Training Workshop** Sept. 2015
Department of Electrical and Computer Engineering, University of Waterloo
The workshop involves:
 - Two short lectures consisting of surprise and prepared topics
 - A marking exercise under the guidance of two departmental mentors.
- **Teaching Assistant, University of Science and Technology of China** Sept. 2013 – Jan. 2014
Undergraduate course: Digital Signal Processing (00618701)
Duties: Instructing students on group projects, preparing and delivering tutorials, answering students' questions, assisting in preparation and grading of exams.

Mentoring Experiences

- Haina Zheng, PhD student at the Beijing Jiaotong University May 2021 – Mar. 2022
Project: Age of Information-Based Efficiency Design in Point-to-Point Communication Link
- Ruijin Ding, PhD student at the Tsinghua University Aug. 2021 – Present
Project: Packet Routing in UAV Multi-Hop Network: A Multi-agent Deep Reinforcement Learning Approach
- Xiaoxiao Zhuo, PhD student at the Zhejiang University Mar. 2021 – Mar. 2022
Project: Value of Information-Based Packet Scheduling Scheme for AUVs in Underwater Acoustic Sensor Network
- Zhi Mao, PhD student at the Jilin University Mar. 2021 – Mar. 2022
Project: Joint distributed beamforming and backscatter cooperation for UAV-assisted WPSNs
- Conghao Zhou, PhD student at University of Waterloo Sept. 2018 – Oct. 2021
Project: Deep reinforcement learning for delay-oriented IoT task scheduling in SAGINs
- Zehao Zhang, undergraduate co-op student at the University of Waterloo Apr. 2021 – Aug. 2021
Project: Implementation and design of a federated learning algorithm design for wireless networks.
- Dairu Han, PhD student at the Nanjing University of Science and Technology Nov. 2019 – May 2021
Project: Joint cache placement and multicast beamforming design in integrated satellite-terrestrial networks.
- Weiting Zhang, PhD student at the Beijing Jiaotong University Nov. 2019 – Nov. 2020
Project: Deep reinforcement learning based resource management for industrial IoT networks.
- Zhe Ma, PhD student at the Tsinghua University Nov. 2019 – Nov. 2020
Project: Joint constellation design and multiuser detection for grant-free NOMA
- Meilin Gao, PhD student at the Beijing Jiaotong University Sept. 2017 – Dec. 2019
Project: Efficient hybrid beamforming design for high-speed railway communications.
- Chuqing Hu, undergraduate co-op student at the University of Waterloo Jan. 2020 – Apr. 2020
Project: Implementation of a learning based resource management algorithm for vehicular networks.

VOLUNTEER EXPERIENCES

- **Group Coordinator, BBCR AI Research Group (10 members)** **Mar. 2019 – Oct. 2021**
Duties: Organizing group members to do advanced research, developing technologies for next generation wireless networks, discussing research ideas with group members, discussing with the researchers of industrial partner, Huawei, Canada about the project progress, organizing biweekly group meetings and backup meeting files, and collecting meeting notes and writing minutes.
- **IEEE Student Branch Chair, University of Science and Technology of China** **May 2013 – May 2014**
Duties: Organizing a number of IEEE on-campus events for undergraduate and graduate students, hosting research seminars on new technologies, inviting distinguished professors to share research experience, organizing volunteers for IEEE conferences, and attracting new IEEE student members.
- **Conference Volunteer, IEEE VTC-Fall 2017, Toronto, Canada** **Sept. 24–27, 2017**

PROFESSIONAL SERVICES

Editor

- Associate Editor, *Springer Peer-to-Peer Networking and Applications*, since 2022
- Lead Guest Editor, *Hindawi Wireless Communications and Mobile Computing*, special issue on “AI-Empowered Resource Orchestration for QoS Provisioning in 6G”, 2022
- Guest Editor, *China Communications*, special issue on “IoT Intelligence Empowered by End-Edge-Cloud Orchestration”, 2022
- Editorial Board, *Frontiers in Internet of Things*, special section on “IoT Services and Applications”

Conference Organization

- Workshop TPC Co-Chair, *IEEE INFOCOM* Workshop on “Pervasive Network Intelligence for 6G Networks (PerAI-6G)”, 2022
- Workshop TPC Co-Chair, *IEEE HPCC* Workshop on “Distributed Intelligence for Future High Performance Unmanned Mobile Systems (DIFUS)”, 2021.
- Track Co-Chair, *EAI CollaborateCom* Track on “Internet of Things”, 2021
- Workshop Co-Chair, *IEEE IPCCC* Workshop on “Edge Intelligence for 6G Networks (EI)”, 2021

Technical Program Committee

- IEEE ICC 2022
- IEEE ICC 2022 Workshop on DDNIS
- IEEE ICNC 2019
- IEEE WCSP 2019
- IEEE VTC-Fall 2020, 2021
- IEEE VTC-Fall 2020, 2022 Workshop

Session Chair

- Heterogeneous Networks, VTC-Fall 2017, Toronto, Canada, Sept. 23–24, 2017

Reviewer of Refereed Journals and Conferences

- IEEE Communication Magazine (CM)
- IEEE Wireless Communications Magazine (WCM)
- IEEE Network Magazine (NET)
- ACM/IEEE Transactions on Networking (TON)
- IEEE Journal on Selected Areas in Communications (JSAC)
- IEEE Transactions on Mobile Computing (TMC)
- IEEE Transactions on Wireless Communications (TWC)
- IEEE Transactions on Cloud Computing (TCC)
- IEEE Transactions on Communications (TCOM)
- IEEE Transactions on Industrial Informatics (TII)
- IEEE Internet of Thing Journal (IoTJ)
- IEEE Transactions on Vehicular Technology (TVT)
- IEEE Transactions on Cognitive Communications and Networking (TCCN)
- IEEE Communication Letters (CL)
- IEEE Wireless Communication Letters (WCL)
